

My Hope for The World, by Ms. Alvarado's Class and Tekla Waterfield

My hope for the world
Is that we'll follow our hearts
To a place that will lead us
Right to the start
Bringing us together
In peace
Cause this world was made for us
Made for you and for me

I might be an artist
Bringing beauty with me
You might work in construction
Mapping plans and building
I might wear a lab coat
And teach others about
The world of science
Or how to earn a black belt

It takes all kinds
To make this world go round
Take care of each other
Pick the trash up from the ground
So go on and be excited
To be who you want to be
When we're doing what we love
A better world we will see
When we're doing what we love
A better word we will see

My hope for the world
Is that we'll follow our hearts
To a place that will lead us
Right to the start
Bringing us together
In peace
Cause this world was made for us
Made for you and for me

Respect Mother Earth, by Teacher Gormly's Class and Tekla Waterfield

Plant trees with my dad
Flowers with my mom
We need fresh air
Come on let's come on

Be nice to people
No matter what they look like
We all belong here
Come on yeah alright
We all belong here
Come on yeah alright

Stop all the fighting
End all the wars
We're here to be happy
That's what we're here for

Fill the world with color
Raise kids who are kind
You can follow your dream
Oh yeah I'll follow mine
You can follow your dream
Oh yeah I'll follow mine

You can be anything
You just got to believe
Respect mother earth
Respect you and me
Respect mother earth
Respect you and me

Kids of the Future, by Ms. Windus's Class and Tekla Waterfield

What do you do
When you have a flat tire
When you're down on the ground
And you need to get higher

When you're feeling kind of sad
And you just need some music
Call us up and you know
You know that we can do it

Kids
Of the future
We're the kids, kids
Of the future

Your walls are blank
You really need some paintings
Trash on the ground
Someone better get to cleaning

We need more trees
Cause we need fresh air
Give us a call
You know we'll be there

Kids
Of the future
We're the kids, kids
Of the future
Ooh
Ooohs

Kids
Of the future
We're the kids, kids
Of the future
